

LAB OBLIGATORIO

The screenshot shows the Google Skills Progress page for user 'anes gonzalez groppo', who is a member since 2024 and has 146 credits. The page features a sidebar with navigation options: Dashboard, Catalog, Paths, Collections, and Credentials. The main content area is titled 'Progress' and includes a search bar for activity names. Below the search bar are filters for Course, Lab, Check, Game, Learning path, and Classroom, along with a 'Show All' button. A table displays the user's progress, with one entry visible: 'Analyzing Billing Data with BigQuery' (Type: Lab, Date started: 17 minutes ago, Date finished: 0 minutes ago, Score: 100%, Passed: Yes).

Activity	Type	Date started	Date finished	Score	Passed
Analyzing Billing Data with BigQuery	Lab	17 minutes ago	0 minutes ago	100%	Yes

LAB OPCIONAL

The screenshot shows the Google Skills Progress page for user 'Clara Bottcher', who is a member since 2025 and has 146 credits. The page layout is identical to the first screenshot, with a sidebar, a 'Progress' header, a search bar, filters, and a table of activities. The table shows one entry: 'Visualizing Billing Data with Data Studio' (Type: Lab, Date started: 24 minutes ago, Date finished: 100%, Passed: Yes).

Activity	Type	Date started	Date finished	Score	Passed
Visualizing Billing Data with Data Studio	Lab	24 minutes ago	100%	Yes	

Preguntas:

Depende de si la suba de costo viene acompañada de más valor por cliente: si el costo de infraestructura por cliente baja o se mantiene mientras suben ingreso, retención o LTV, es crecimiento rentable; si el costo sube sin que mejore ninguna métrica de negocio, es ineficiente. Para verlo, habría que comprar el costo incremental por usuario que usa la funcionalidad contra el ingreso incremental o el churn evitado que genera (idealmente con un A/B test), y mirá el margen bruto por cliente y el payback del incremento.
